

International advanced hot spring technology, embrace a healthy self.

Hello! I'm湯治研究所

ごくらく ゆ

International first-class hot spring technical advisory services

Technology for Health.

Research and
Development of Hot
Spring Technology

International Technical Cooperation.

Technical authorization,
Sharing the Healthy Market

What WE Do?

THE MINIMAL PRESENTATION

Specialized in the research and development of artificial hot spring and spa equipment technology

(R&D)

Hot spring technology research and development

Consultation

Free hot spring technical consultation

Cooperation

Technology output and market cooperation

Technical

Technical exchange

Research organization Team

Outstanding representative in hot spring field of Japan, health guidance expert team

MS. AlharaHealth consultant

MR. HadaHealth coaching specialist

MR. GenjiHealth coaching specialist

MR. Etou Health consultant

ぎじゅつ がいよう

技術概要

Technical elite team, core technology control, advanced cooperation sencept.

Core technology

Development of Equipment Intelligence

Intelligent Research and Development of Hot Spring Equipment and Spa Equipment.

"炭酸泉"とは、炭酸ガス(二酸化炭素)が溶け込んだお湯のことで、別名「ラムネのお風呂」とも言われています。 日本の温泉法では、お湯1リットルに炭酸ガスが0.25g以上(250ppm)溶けたものが炭酸泉と定義されており、その中でも、1000ppm以上のものを高濃度炭酸泉と言います。炭酸泉は、濃度が高ければ高いほどその効果を発揮すると言われています。炭酸泉は、他の温泉には無い独自で明確な作用があることが医学的にも証明されており、各方面において広く活用されています。 The so-called "carbonate spring" is due to the dissolution of carbon dioxide into hot water. Also known as lemonade bath. Japan's hot spring method defines a concentration of more than 0.25 g (250ppm) of carbon dioxide per liter of water, Called Carbonate Spring. More than 1000 ppm is called high concentration carbonate spring. The unique medical value of carbonate spring has been proved.

ミルキー風呂とは、超微細気泡発生装置によりできるミクロの泡で、色は牛乳のようだ、毛穴の汚れがとれ、お肌がつるつるに。

【効果・効能】皮膚呼吸の促進や保温、モイスチャー効果が期待でき、しっとり肌を生み出します。また、マイクロバブルの優しく強いバイブレーションによって、毛穴の老廃物を取り除き、リラクゼーション効果も。

ミクロ泡で肌当たりのいい「ミルキー風呂」。さらに、湯面に発生する大量のマイナスイオンからのリラクゼーション効果も期待できる。

The Milky bath is a micro bubble that can be made by the ultra fine bubble generator, the color is milk, the pores are dirty, and the skin is smooth. The effect of skin breathing, heat and moisture effects can be expected to produce moist skin. In addition, the gentle vibration of the micro bubble removes the waste of pores, and the relaxation effect. Milky bath with micro bubbles and skin. In addition, the relaxation effect from a large amount of negative ions generated in the plane surface can be expected.

インテリジェント化研究によると,人工温泉装置【スプリ ンガー】により、温泉成分、硫黄成分、などを機械制御に より均一化を図りながら浴槽に投入し作られた人工的な温 泉です。

【効果・効能期待】疲労回復、荒れ性、肩のこり、冷え性、 腰痛、神経痛、リウマチ、痔、あせも、しっしん、うちみ、 くじき、産前産後の冷え性など。

The intelligent research shows that by using the artificial hot spring device [Springer], the components of hot spring and sulfur are homogenized through mechanical control, and the hot spring is put into the artificial hot spring produced in the bath.[efficacy ·efficacy expectation] fatigue recovery, coarseness, shoulder stiffness, lumbago, neuralgia, rheumatism, hemorrhoids, prickly heat, dampness, knotting, drawing lots, pre natal and post

natal chill, etc.
